Core CMS Program – RFI Detail Assessment

What have we done

- Targeted 17 vendors for response to RFI.
- 15 vendors submitted RFIs.
- 11 vendors were assessed initially based on their submission of a germane response to the RFI.
- Detail assessment focuses on 8 vendors.

What did we learn

- Early findings show (**From a court business perspective**)
 - Observation: Half the vendors that submitted a response show promise toward being able to support the Washington State Courts.
 - Observation: Products in the mix demonstrate some form of support for both resource management and probation.
 - Observation: At least one product may be mature enough for consideration in supporting the needs for the Appellate Court.
- Early findings show (**From an agency technical perspective**)
 - Observation: Most of the vendors that submitted a response demonstrate capable technology platforms that may align with overall strategies to meet the near and long term needs of Washington State Courts.

Next Key Steps

- Follow-up with key vendors to address points of clarity on their responses by business and technical area.
- Hold product demonstrations to better understand vendor capabilities and further clarify what products can and can't do.
- Draft final executive summary with recommendations based on addressing support for:
 - CMS – statewide
 - Appellate Courts
 - Resource Management
 - Probation
